

SY 2024-2025

ALTERNATIVE EDUCATION PROGRESS REPORT

Frequently Asked Questions (FAQs)

Frequently Asked Questions

What is the purpose of the Alternative Education Progress Report (AEPR), and how is it different from the District's School Progress Report on Education and Equity (SPREE)?

The AEPR is the School District of Philadelphia's (SDP) tool for understanding the performance of its alternative programs across multiple dimensions, from academic achievement to college and career readiness.

The AEPR differs from the SPREE in ways that reflect the unique structures and goals of alternative programs. More specifically, the AEPR:

- Includes performance metrics tailored to the types of alternative programs being evaluated;
- Is scored using different performance expectations and methods; and
- Uses different terminology to categorize program performance.

How does the performance of alternative programs compare to that of traditional schools receiving an SPREE?

Alternative programs cannot be compared to traditional schools using scores from the AEPR and SPREE. Scores from the AEPR reflect how programs are performing relative to performance targets established in program contracts; schools receiving the SPREE are assigned levels based on the number of metrics meeting annual targets or showing improvement in alignment with the Board of Education's Goals and Guardrails.

Additionally, while many metrics on the AEPR appear to measure things similar to metrics on the SPREE, the AEPR metrics are often calculated using different definitions and business rules and are scored using different performance expectations.

What are the different AEPR types?

There are five different report types of the AEPR, each intended to evaluate performance on metrics that are most relevant to each type of academic model and its unique purpose:

- Transition – for Alternative Education for Disruptive Youth (AEDY) programs that serve students who have committed serious Code of Conduct violations and assist them with transitioning back to non-disciplinary schools.
- Accelerated – for programs that serve students who are overage and under-credited and assist them in getting back on track.
- Adult Diploma – for programs that serve students who are older than 17 years old (no upper age limit), who have earned some high school credits, and who are not enrolled in a regular day school.
- Continuation – for programs that serve students in need of smaller school settings that provide intensive academic and social supports.
- Dual Enrollment – for programs that allow students to earn credits toward their high school diploma and a college degree simultaneously.

How are programs' overall scores calculated on the AEPR?

The overall score is calculated as the percentage of eligible metrics for which the program met or exceeded performance targets that were mutually agreed-upon by SDP and the

program providers. Metric eligibility is determined by programs' contracts with SDP and available data.

Contracted providers adhere to the targets outlined in their contract. Metrics that are suppressed due to small sample size do not factor into a program's overall score.

How are overall scores grouped into categories?

Overall categories are based on the percentage of targets for which programs met or exceeded expectations.

- A label of **Excelling** indicates that a program has met 75% or more of targets;
- A label of **Achieving** indicates that a program has met 50-74% of targets;
- A label of **Approaching** indicates that a program has met 25-49% of targets;
- A label of **Underperforming** indicates that a program has met fewer than 25% of targets.

What are the minimum and maximum overall scores on the AEPR?

The overall score is the percentage of targets for which the program met or exceeded expectations. Therefore, the minimum score is 0% and the maximum score is 100%.

How are the four metric performance tiers – Exceptional, Target, Near Target, and Did Not Meet – determined?

These categories are relative to the metric-level performance targets established during the round of contract negotiations with contracted alternative providers in 2022 for program years 2022-2023 to 2026-2027.

The cut-points required for each tier and program type can be found in Appendix B of the AEPR User Guide.

Is there more information on how each metric is calculated?

Yes. The AEPR User Guide, available on the Office of Evaluation, Research, and Accountability's [website](#), explains which program types receive which metrics, how those metrics are calculated, and which students are included in each metric. Further information about metric calculations is available in the AEPR Business Rules document.

Please visit [the AEPR webpage](#) for more information.

Where does the demographic information on the front page of an AEPR report come from?

Information on Black/Hispanic students and English learners was taken from the District's Student Information System. Information on low-income students was taken from the Pennsylvania Department of Education's [Community Eligibility Provision webpage](#). The remaining demographic information was self-reported by programs.

Keep in mind that the demographic information may underreport true rates for several reasons, including:

- Students may not be eligible for the benefits that classify them as low-income or for receipt of special education services due to age or other factors;
- Programs are not required to track information on whether students were pregnant or parenting, justice-involved, or homeless and so may not be able to provide a full count;

- Students may not wish to identify themselves to their program as falling into one or more of these demographic categories.

How does the demographic information on the front page factor into a program's score?

The demographic information does not factor into a program's score or performance expectations. The information is presented to provide an overview of the types of students served by that program.

Why don't some alternative programs have an AEPR?

Justice programs, such as Pennypack House School and the Philadelphia Juvenile Justice Services Center School, do not receive an AEPR because these programs operate under especially unique circumstances; consequently, limited academic data is available and limited climate data is applicable to these contexts.

How are survey metrics scored?

The AEPR contains several survey metrics that use data from the SY 2024-2025 Philly School Experience Survey:

- Climate Score
- Instructional Environment Score
- Family Engagement Score
- Student Survey: College and Career Rating

The College and Career ratings are presented as the percent of most positive responses. "Most positive response" refers to the value on the question response Likert scale that reflects the most positive outcome for the student or school, based on the question.

Note: The "Question Explorer" section of the [survey dashboard website](#) displays the actual response value that is the "most positive" for each question. For example, on the Student

Survey item: "A student threatened or harassed me in-person while I was at school," the possible responses in 2024-2025 were: "Many times," "More than once," "One time," or "Never".or this specific question, the most positive response value is "Never."

The Climate, Instructional Environment, and Family Engagement Scores are schoolwide average scores for the items included in the relevant topic areas. Responses from teachers and students are included in the Climate and Instructional Environment Scores, and responses from parents are included in the Family Engagement Score.

The participation threshold for the 2024-2025 parent/guardian survey is 10%. The participation threshold for the student survey is the greater of 25% of all students in grades 3-12 or 5 students. The participation threshold for the teacher survey is also the greater of 25% of teachers or 5 teachers.

Programs that serve fewer than 50 students and/or have fewer than 5 teachers are not eligible for the survey metrics and receive a label of "Insufficient Sample" for these metrics. Programs that have at least 50 students and 5 teachers but that do not meet minimum participation thresholds receive a metric score of "Did Not Meet."

Which questions are included in the survey metrics?

The survey metrics are developed by the [Office of Research and Evaluation](#) (ORE), which administered the [Philly School Experience Survey](#). The specific questions included in a metric may change over time.

More information on the surveys, including responses to individual survey items, is available on the [Philly School Experience Survey Dashboard](#).
